ORDER REMOVING  
RESTRICTIONS

TO PRACTICE NURSING IN THE  
STATE OF NEW JERSEY

---

This matter was opened by the New Jersey State Board of Nursing ("Board") upon receipt of respondent's request for removal of all restrictions imposed pursuant to a Modification of Final Consent Order filed on August 27, 2008. That Order required respondent to remain enrolled in the Recovery and Monitoring Program of New Jersey (RAMP) and to comply with program

requirements until successful completion.

Previously, respondent had been suspended for two years pursuant to a Final Consent Order entered on November 5, 2006, with the suspension stayed and served as a period of probation. The basis for that stayed suspension was a finding of professional misconduct concerning misappropriation of 27 tablets of Darvocet on March 27, 2006, and misappropriation of a packet of Tylenol on March 28, 2006, while employed as a nurse.

Respondent has participated in RAMP and was released from the program on April 29, 2011 following successful completion of the program. The Board finds that, inasmuch as RAMP supports respondent's petition for removal of all restrictions on her nursing license, entry of the within Order is appropriate. Finding that this Order is sufficiently protective of the public health, safety and welfare, and for other good cause shown;

IT IS ON THIS 18<sup>th</sup> DAY OF July, 2012,

HEREBY ORDERED THAT:

1. Respondent's petition for termination of the conditions imposed pursuant to the 2008 Order is hereby granted, and respondent's nursing license is no longer subject to restriction or encumbrance.
